

Introduction (Opiate For the Masses / The Spore)

Opiate for the Masses

The slightest breeze will spread disease
You breathe it in, it takes you to your kneesCan't keep your feet on the ground anymore
Don't know what's up or down anymoreDon't lie to me - you're suffering
It's a perfect day - would you like to play with me?Can't keep your feet on the ground anymore
Don't know what's up or down anymoreI introduce you the highest grade
As I seduce you, don't be afraid
Don't have to bruise you to get my way
I'll never lose you or go astrayCan't keep your feet on the ground anymore
Don't know what's up or down anymoreDon't make a sound if it'll only fade
'Cause with me around you that's no fair tradeCan't keep your feet on the ground anymore
Don't know what's up or down anymoreI introduce you the highest grade
As I seduce you, don't be afraid
Don't have to bruise you to get my way
I'll never lose you or go astrayDon't lie to me - you're suffering
It's a perfect game - would you like to come with me?I introduce you the highest grade
As I seduce you, don't be afraid
Don't have to bruise you to get my way
I'll never lose you or go astray
