

Waiting for Love

Medina

Its like were connected, its like Im infected.

Saw you and expected something would go down.

This feelings electric, it came undetected, like Ive been selected and I dont know how.Cause theres something about you and me tonight, theres something you do got me feeling right.

Cause youre so magnetic, yeah I feel ecstatic.

Im gonna wait and wait, Im done, Im done waiting, Im done, Im done, wait, wait. Im done waiting.Waiting for love, waiting for love, waiting for love, waiting for love, Im good enough inside, caught up in the strobe lights.

I wasnt looking for someone till I found you.

Waiting for love, waiting for love, waiting for love, waiting for love, Im good enough caught up in the strobe lights.

I wasnt looking for someone till I found you.No, my mind is made up, and I just cant say stop, Im dreaming cant wake up, cant turn around.

My hearts in a headlock, try moving but Im stuck.

Were all just alive before you.Cause theres something about you and me tonight, theres something you do got me feeling right.

Cause youre so magnetic, yeah I feel ecstatic.

Im gonna wait and wait, Im done waiting for love, waiting for love, waiting for love, waiting for love, Im good enough inside, caught up in the strobe lights.

I wasnt looking for someone till I found you.

Waiting for love, waiting for love, waiting for love, waiting for love, Im good enough caught up in the strobe lights.

I wasnt looking for someone till I found you.Waiting for love, waiting for love, waiting for love, waiting for love, Im good enough inside, caught up in the strobe lights.

I wasnt looking for someone till I found you.

Waiting for love, waiting for love, waiting for love, waiting for love, Im good enough caught up in the strobe lights.

I wasnt looking for someone till I found you baby.I wasnt looking for somebody till I found you.
