Once I Walked in the Sun

Jane Monheit

Once I walked in the sun
You told me I was the one
Who made this life
So it is worth the sorrowYou said you felt the same
You reached out and whispered my name
Promising me tomorrowAll you left me is a song
I sing it now that you've gone
At least love in the songs, lasts foreverMusic only survives
In the melody we're alive
Feeling it all together
Living inside a songWhen we made love
What a perfect world we made together
When we made love
How I wished that life went on and onOnce I walked in the sun
Once I walked in the sun
I feel the light until my life is doneLovers dance by the sea
And they're always you and me
And music soft as the night falls around usHope you're watching the stars
And the moonlight falls where you are
One time the music found us
One time we made a songWhen we made love
What a perfect world we made together
When we made love
How I wished that life went on and onOnce I walked in the sun
Once I walked in the sun
I feel the light until my life is doneOnce I walked in the sun
Once I walked in the sun
I feel the light until my life is done, ohOh, once I walked in the sun
Once I walked in the sun
I feel the light until my life is done
