Where Did We Go Wrong

Magna-fi

This world is burning down, hummmm
I sleep to stop the sound
From helping it along
Just where did we go?
Just where did we go?
Just where did we go?My friends are moving on
And fading out
Beneath a sky of shame
And clouds of ugly doubt
You're all so perfect
Complete and worth it
Just where did we go wrong?Where did we go wrong?
(X3)You and I were enemies
In another life, in another life
I don't want your sympathy
Where did we go?Where did we go wrong?
(X2)So let the truth be known
And shout it to the world
I always tell the truth
So give it in return
My life's a blunder
My parent's wonder
Just where did we go wrong?You're all so perfect
It's just not worth it
Just where did we
Where did we go wrong?
Where did we go wrong?
Where did we go now?
Where did we go?
