

Cold Kisses

[Steve Holy](#)

Under the stars, Spanish guitars
Sing the Santa Maria outside my room
The music's playing on a sweet bougainvillea breeze
Romantically, oh, but not for me There's a ring of ice around the moon
And it's making me shiver
It seemed so warm when I had you
But all the others I've known leave me chilled to the bone
Baby, since you've been gone, all I'm left with is cold kisses My pride has tried to build a fire that's as bright as
your memory
But I can't give what has been given
I just don't have it in me now
I'm all closed down and the fire's burned out There's a ring of ice around the moon
And it's making me shiver
It seemed so warm when I had you
But all the others I've known leave me chilled to the bone
Baby, since you've been gone, all I'm left with is cold kisses Like a rose in the snow
That won't bloom and can't grow There's a ring of ice around the moon
And it's making me shiver
It seemed so warm when I had you
But all the others I've known leave me chilled to the bone
Baby, since you've been gone, all I'm left with is cold kisses Cold kisses, cold kisses
