I Want You

Katie Carroll

I see you in my dreams at night
When reality is mine
I can make it do anything
I saw the way you looked at me today
I saw it in your eyes you wanted me to stayOkayI want you, and I know you want me too
I like the things you say to me
From over there
I'm not here to tie you down unless you want me too
oooooo-oooo-ooo-ooDeep, in my thoughts theres you and me
We're on fire in the dark
And you're giving me everything
I know there's nothing else to say
Between you and I
No questions in the wayI want you, and I know you want me too
I like the things you say to me
From over there
I'm not here to tie you down
unless you want me tooI want you, and I know you want me too
I like the way youre moving me from over there
I'm not here to tie you down
Unless you want me tooI feel everything
No one else(?)
But inside of me(?)I feel everything
No one
So, so much more without our clothes
You're underneath my skin
I can feel you everywhere you move around
And stir me with the sound
Of your breath and sweat dripping to the groundI want you, and I know you want me too
I like the things you say to me
From over there
I'm not here to tie you down
unless you want me too
OhhhI want you, and I know you want me too
I like the way youre moving me from over there
I'm not here to tie you down
Unless you want me tooI feel everything
