Freedom

Cathedral

Listen while I tell ya, each and everyone
About the state our planet's in and what should be done
Wheels of freedom turning backwards on themselves
Liberty is burning, in this hell, this cosmic cellFreedom for the people, humanity and all mankind
Liberate your soul and mind, it's waiting for you all to findBut getting it together is what I'm talking about
Ain't got time to argue, just time to turn it out
Look into the future, just tell me what you see
If we don't love each other, there'll be no harmonyFreedom for the people, humanity and all mankind
Liberate your soul and mind, it's waiting for you all to findFree wheel keep turning, open up your mind
Star-spangled stairway, that you're waiting to climb
It's just a bummer, they're fascist rules
Police and politicians, pushing on youFather of creation, master of this tomb
Universal messiah, motherfucking king of doom
We don't ask forgiveness, for our sins against you lord
We want retribution, for the twisted ways you've taught
