

Peril After Peril

[Link 80](#)

came up short in time to fall behind. i don't wanna give up, i've sacrificed my life. peace will settle in, be forever incomplete. but we're... still trying. live for the day. an uncertain life. untimely demise. chance will take it's toll. it could end at any minute. enjoy it while you can. live for the day. unconscious thinking of the future. the freedom of the road vs. the threat of today. it could end any moment. the death of a dream. euphoric visions of the past serve to drive this thing. confidence builds... the lifestyle takes hold. things come together. play the rockstar role. spend every waking moment trying to preserve the past. and we're... still trying. please don't complain about your situation. open your eyes or this will be the end. the time of your life and with dear friends. there are many bad times. don't take your problems out on them. not down yet... so we've beat the odds. treasure every moment held deep in the heart. peril after peril... pull ahead. in the end, things look up. in time they'll fall down again.
