

# Don't Bother Me

## Murphy's Law

Don't come 'round here looking for my sympathy  
Don't come 'round here looking for my prayers  
    You spent the eighties in a trance  
    Yeah you led us all on a merry dance  
    Now it's sad to say that I don't care  
You were always advocating power games  
    You were always gonna be a star  
You made your money, had your fun  
    Made a video 'bout how it's done  
    Ain't put it in my vcr  
    So far  
    Dreams fall into disrepair  
    There's a change in the air  
    Your lies  
    Will lead you to despair  
    Don't bother me  
(castles in the sand slip through your hand)  
    Don't bother me - I don't give a damn  
    Don't bother me  
(try to understand it's in your hand)  
    Don't bother me

Well no amount of liquor, babe, can drown the blues today  
    No amount of pills can ease the pain  
When the body electric and the vision thing  
    Is all it takes to make the people sing  
    Let's hope we don't get fooled again  
        My friend  
        Dreams fall into disrepair  
        There's a change in the air  
        There's a girl who says she cares  
            And her love  
        Will leave you standing there  
        Don't bother me  
(I can't change your mind when you're so blind)  
    Don't bother me - I can't spare the time  
        Don't bother me  
        (takes an ocean wide to turn tide)  
    Don't bother me - love can't be denied

Don't bother me  
(castles in the sand slip through your hand)  
Don't bother me - I don't give a damn  
Don't bother me
