Poison Girl

Circus Of Power

I did it all just for her
I did it all just for her
And love's heart is death
For me and my poison girlA prey she was for the cruelty of love
While its serpent inside crawled straight towards her heart
The coldest kiss love ceased to exist
While we grew apart like never beforeI did it all just for her
I did it all just for her
And love wants us dead
Just me and my poison girlI did it all just for her
I did it all just for her
And love's heart is death
For me and my poison girlThe fire in her eyes
Grew dim and then died
As the poison inside
Reached her heartAnd the coldest kiss
Faith ceased to exist
As we grew apart
Like never beforeI did it all just for her
I did it all just for her
And love wants us dead
Just me and my poison girlI did it all just for her
I did it all just for her
And love's heart is death
For me and my poison girlAnd the taste of the poison on her lips is of a tombI did it all just for her
I did it all just for her
And love wants us dead
Just me and my poison girlI did it all just for her
I did it all just for her
And love's heart is death
For me and my poison girlPoison girlPoison girlPoison girlPoison girlAnd love's heart is death
For me and my poison girl
In this poison world
