Foeticide

Darkrise

Plugged into the socket
Leads attached to twisting skin
Ignite the squirming foetus
To dissolve it from withinThe uterus aspirated...foeticide
Suction catheter eradicating...your insidesFoeticides done daily
Frying them inside the womb
Electrocuting embryos
In their sterile tombYour cervix an abscess... foeticide
Pumped out by your gynaecologist... your insidesSpasmodic convulsions of pleasure are gained
Pumping out the boiling gunge as you languish in pain
Scouring out the womb from effervescing rot
Scrubbing-brush comes in handy to clean out all the clotsElectrodes buzz with power
Visceral muscle is charred black
Melting bone, frying aqueous humour
A dignified death is what you lack
