

Spread Your Love

Earth, Wind & Fire

As we speak about love today
Many men will let it drift away
Until inner feelings recognize
That inner joy will harmonize There is one possibility
That we share universally
It dont take much ability
To let it shine naturally Spread your love around and around the land
Spread your love to every grain of sand
Spread your love, lets spread our love together
Spread your love, I can feel it getting better
Spread your love, lets bring our hearts together
Spread your love, spread your love around As you live one day at a time
Independence plays on your mind
To bring you experience
Human love is damn serious Spread your love, lets spread our love together
Spread your love, I can feel it getting better
Spread your love, lets bring our hearts together
Spread your love, spread your love around Someday, the world will smile again
Someday, all brothers will be friends
We will then truly understand
Inner light and universal plan Until that time comes around
Ill be your friend through ups and downs Spread your love around
Spread your love around
Spread your love around
Spread your love around
