Back to Earth

Magnum

I miss those evenings and the company
The lights go down around this place
The nights are long and go on endlessly
And I forget the human race
But there's one thing that brings me back to Earth
Please tell herTell her I need her
Tell her I want her
Tell her I miss her more every day
Tell her I need her
Tell her I want her
Tell her I miss her more every dayI take the days and spend them crazily
The feeling lasts all of my life
And while I thought that would be ecstasy
Caused no surprise but still shines bright
But there's one thing that brings me back to Earth
Please tell herTell her I need her
Tell her I want her
Tell her I miss her more every day
Tell her I need her
Ooh, tell her I want her
Tell her I miss her more every dayOh, time goes, time goes
Solar shadows
I need her with me
All too clearly
Everybody knowsTell her I need her
Tell her I want her
Tell her I miss her more and more every day
Tell her I need her
Ooh, tell her I want her
Tell her I miss her more and more every day
