Confused

The Suicide Machines

skyscraper so call said
they're choking out the sun
and we're all so paranoid of everyone
there's no trust, no love
no future for mankind
if this life's about getting ahead
i'll just stay behind
poisoned clouds raining down from above
don't know what we're thinking
in a life there's no love
let's start a war for financial stability
this world has become our graveyard
and still we can't see
politicians reigning down from above
don't know what we're thinkin
in a life there's no love
let's start a war for financial stability
this world has become our graveyard
and still we can't see
what do we learn?to kill better
what do we learn? to kill better
what do we learn? to kill better
what do we learn? 1-2-3 WAR!
learn from history to kill better
(times 3)
disconnected since birth
success is weighed by your worth
what is economics?
its the power and who has got it
words i don't understand
progress means to rape the land
really does history teach?
circles, cycles, leach
poisoned clouds raining down from above
don't know what we're thinking
in a life there's no love
let's start a war for financial stability
this world has become our graveyard
and still we can't see

politicians reigning down from above
don't know what we're thinkin
in a life there's no love
let's start a war for financial stability
this world has become our graveyard
and still we can't see
what do we learn?to kill better
what do we learn? to kill better
what do we learn? to kill better
what do we learn? 1-2-3 WAR!
learn from history to kill better
(times 3)
