

Never Change Lovers in the Middle of the Night

Boney M.

You and I were finished, I was through with you
Splitting up forever, seemed the thing to do
I said I can't stand you with your honey touch
This time you were cheating me one time too much
Just then I remembered that a friend I knew
Told me one thing, I should never do
Never, never change your lovers
In the middle of the night
Everything may look so different
In the early morning light
Never, never be too hasty
When you're groping in the dark
What you're getting into may be just a lark
Keep your cool and don't change lovers
When you're feeling sorta high
Sorta big and high and mighty without really knowing why
Let the heat wear off a little
Give your man another chance
And don't fall for someone else's song and dance
Sure there was this guy, right next to me
Mine just for the asking, he said he would be
But to leave my man seemed to me all too strange
And I'd say that I'm glad, I didn't make the change
Now our life is almost like a paradise
Let me pass on to you this advice
Keep your cool and don't change lovers
In the middle of the night
You may feel a strong temptation
The vibrations may be right
But who knows what's gonna happen
You may simply lose your cool
When you find it, you'll find out you were a fool
Never, never change your lovers
Under any midnight spell
Take it easy, slow and easy
Everything will turn out well
Let the sunshine on a new day
And don't move while you're uptight
Changing lovers in the middle of the night
Never, never change your lovers
In the middle of the night
Everything may look so different
In the early morning light
Never, never be too hasty
When you're groping in the dark
What you're getting into may be just a lark
Keep your cool and don't change lovers
When you're feeling sorta high
Sorta big and high and mighty without really knowing why
Let the heat wear off a little
Give your man another chance
And don't fall for someone else's song and dance
