## **After Hours**

## **Caribou**

And you and I will follow down the street
And when the rivers end into the sea

While I remember what you mean to meAnd you and I, a spiral spinning round
And standing in a circle on the ground

I'll follow you until you wear me outAnd in your summer and in the air
Have you forgotten how you got us here?

While I remember how much I careAnd in a dream I'm trying to forget
I feel the blood that rushes to my head
I need your love and all the things you've saidAnd in the leaves
And in my mind
You're always thereAnd in the leaves
And in my mind
You're always there
