

Doctor Watching

I Got You on Tape

On the floor you command me to sit down while you're taking over
Best to think twice when wheeling the helpless outside
Haven't felt this for ages, lighter now than before
Time to kiss and tell everyone goodbye

Now come on honey hand me your car keys
Going light speed traveling
Stick around if you want me to fix you good
Put the pill in your mouth and don't worry what it is you having
Better days are soon to come to you

Locking up time out in the country
With a doctor watching
Did his best now it's not really working no more
Got my tongue tied to the ceiling and my finger touching
Afraid that I might hit the floor

Came around when I sat at the doorstep, I could see you waiting
Come in and I'll give you the 411
In between what I did and you said, lights were fading
All the things I know to be undone

Now come on honey hand me your car keys
Do it while I'm watching
Come around if you want me to fix you good
Put the pill in your mouth and don't worry 'bout the blood and coughing
In the end it's gonna do you good
