

# Tightrope

## Fanfarlo

Tightrope, blank sheet  
Everything could change today  
Look ahead, don't look away  
It's a fine line to a single point A deaf ear, a blind eye  
Red handed with your head in the sand  
But thoughts get lost again like letters  
And soon our car sick minds will pull over Just let it go, just let it go  
Just walk in a straight line, just let it go  
We've been keeping it down, we've been holding it down  
Just walk in a straight line, just let it go Tightrope, from there to here  
There was never a point of return  
It cries out through our telephones  
We know it all but we don't know how to use it Heartbeat, fast luck  
Everything could change today  
But thoughts get lost again like letters  
And soon our car sick minds will pull over Just let it go, just let it go  
Just walk in a straight line, just let it go  
We've been keeping it down, we've been holding it down  
Just walk in a straight line, just let it go Just let it go, just let it go  
Just walk in a straight line, just let it go  
We've been keeping it down, we've been holding it down  
Just walk in a straight line, just let it go
