Cali

Kid Indigo

It's not that easy to say this
Come with me to California
I know you're sick and tired of waiting

For something new
And no one has to know that you're with me
From Cali we'll hit New York City
And when there's nothing left to do
Just know I'll run away with you
Away with you
Just me and you
Away with you
She's probably off doing her own thing
Not a care in the world for this young teen
But babe believe me, you're still on my mind
Follow me, we got a date with the stars tonight
The look inside your eyes like Northern Lights
And when there's nothing left to do
Just know I'll run away with you
Just me and you
To somewhere new
Away with you
I'll run away with you
Away with you
To somewhere new
Why can't you understand?
I'm running as fast as I can
We may be done, just please never forget me
Why can't you understand?
I'm running as fast as I can
I may be wrong, just please baby forgive me
We may be done, just please baby forgive me
I may be wrong, just please baby forgive me
We may be done, just please baby forgive me
And I'll keep writing you letters like you miss me
Ooh
Yeah
It's not that easy to say this
But come with me to California

I know you're sick and tired of waiting
For something new
And no one has to know that you're with me
From Cali we'll hit New York City
And when there's nothing left to do
Just know I'll run away with you
Away with you
Just me and you
To somewhere new
Run away with you
Away with you
I'm waiting
I'm waiting
To run away with you
