

The Beast Raping

Vader

mammary vow to the pleasure hunt
She gladly accepts in semen streams
life-drenching vaginal penetralia
Her Tokens of Loves are never defied
Drunken with the filth of the purest Desire
obedient She spreads the legs truly wide
for "Isis In Welcome" is the proper posture
yet Lady of Command She always is
Human apes, all what's to despise
too blind to see through Her Writ
erect phalloi salute Her Glory
of Fire-Hole astride the Beast
Slimy verses of wild-pounding gore
is what She writes with the holies Pean
all left for her is just to take
one little step into your world
