

Birthright

Verge of Umbra

Birthright

chorus

Protest means nothing to the rich
Promises mean nothing to the poor
They both stand in places they don't fit
Both sides will always want more
expose I to the most high of God
We barely know who we are
So we fall into the path of war
But higher consciousness is what we should explore

Explore the connect we have with all things
explore the event that ripped off our wings
Explore the agenda planned for our kids
Question the wealth and crown of our kings
Ancient Knowledge of how to fly, you and I were born with, robbed as a child
Let's go for it, let's cross the line, they've kept us from it and this is why
You must! Take back your birth right x2

Verse 1

Wage slaves start to break up their chains
and misinformation caked in the brain
From media tactics and propaganda
GMOs and corn crops of cancer
Took my money back from the bank I did
Gone off the grid with the wife and the kids
Had to fight for the life that I live
from them puppet soldiers with a license to kill
took many shots but our guns sprayed back
we got the greater numbers that they lack
Attack! This is what it has come to
The people defeat the elite, making them humble
As their pyramid crumbles

Verse 2

Our health has been restored now
the masses took control now
No indoctrination to hold us down

Cooperations tore down
Took back the land they stole now
Food enough to go around
All achieved and we still have yet
To connect our collective consciousness
We come together in masses,we come together in mind
Like a phoenix from the ashes, our birthright is to fly
