Solution

Peter Frampton

I don't need your analysis
Your opinion, that's all this is
I don't need you
Pulling me in this pain

I've become negative
By the time that I think
Or something like that
I don't need this box
You're keeping me in

What I really need
In a world of revolution
What I really want
Is a government solution

I don't want you treading on me
I don't want you spitting on me
None of this you would ever
Do face to face

Yes, I'm different from what I read
And then you ask if it's really me
Life was better before
You invaded my space

What I really need
In a world of revolution
What I really want
Is a government solution

What I really need
In a world of revolution
What I really want
Is a government solution

What I really need
In a world of revolution
What I really want
Is a government solution
