

# Ollie North

## Donovan Wolfington

Take control  
of all the things you want to hold  
Hide the things that you don't want to know  
It's hard to tell  
when all your friends live in hell  
try to relate, but you can't take the smell  
But you see,  
You and me,  
There's an innate realm of possibilities  
Look around  
hear the sounds  
Get alone  
Rediscover sex and go insane  
The problems that you have get in the way  
Take your self away with LSD  
Patch up all the pain, then back to present day  
It's a disgrace  
It's a castration of the thrill and the chase  
Look alive  
And open my eyes  
Get alone  
And it's hard to sleep  
When you never get to eat  
It's a sign  
It's all a lie  
Get alone
