

# El Dorado

## Trial Kennedy

What about the taste of  
What about the make of  
Learn about the names of  
Never doubt the range of  
The word is not a problem

When every garment gets undone Even though I search and survive

Call off all my search of desire What about the taste of

What about the names of  
What about the love  
Let her know your patient  
Smug imagination  
The work of love must die

Then everyone else gets my life Even though I search and survive

Call off all my search of desire

Devo, devo

Where everything is safe

With every law you break Tearing up all devotion

Turning up all the motion
