Into the Light

Siouxsie and the Banshees

Into the light, I see it fine
Into the light, our hearts entwine
Remember when your time again
Remember when your time againStanding in the light
Always sitting on the line
Never on a side
Always wanting to be rightStanding in the light
I never wanted to be right
Now I'm attracted by the light
And blinded by the sightInto the light
Into the light
Into the light
Into the lightInto the light, I see it fight
Into the light, a new horizon
Bleached into white, kept out of sight
Bleached into white, kept out of sightStanding in the light
Always sitting on the line
Never on a side
Pushing out the lightStanding in the light
I never wanted to be right
Now I'm attracted by the light
And blinded by the sightRemember when your time again
Remember when your time againInto the light, I see it fine
Into the light, our hearts entwine
Remember when your time again
Remember when your time againDead ahead in the night
Burning in the light
And knowing that it's right
Driving in the nightDead ahead in the night
Burning in the light
And knowing that it's right
Driving in the nightRemember when your time again
Remember when your time againInto the light
Into the light
Into the light
Into the lightInto the light
Into the light
Into the lightInto the light
Into the light

Into the light
