

# All We Are

## Robbie Rivera

Every time i close my eyes  
I see the world with no disguise  
You and i, we are together

Silent hearts and beating drums  
Fill the space inside my lungs  
And our love keeps, marching on and on and on

All we are is who we are  
When the world gets in our way we do it all way  
All we are is who we are  
When the world gets in our way we do it all way

Way, way, way, way, way

When the night has just begun  
I let the words slip past my tongue  
It send the world will know i love you

You got my hand displaced in yours  
We'll tell the world to get off once more  
While our love keeps marching on and on and on and on

All we are is who we are  
When the world gets in our way we do it all way  
All we are is who we are  
When the world gets in our way we do it all way

Way, way, way, way, way
