

I Need Love

*NSYNC

I need love, you need love
We all really need love
All I want, all I need
We all really need love I just wanna tell you how I feel
I just wanna have a love that's real
How can I stop this burning desire? I can see that you're the one for me
You're the only one I really need
I need a love that burns like a fire I need love, you need love
We all really need love
All I want, all I need
We all really need love, I need love All I wanna do is give it a chance
Everybody needs a true romance
I would give anything to be with you I will give you all the love you need
If you only give your love to me
What would I do if I were without you? I need love, you need love
We all really need love
All I want, all I need
We all really need love I need love
I need love
I need love I need love, you need love
We all really need love
All I want, all I need
We all really need love I need love
I need love
I need love
