Black Universe

Majorleap

Black Universe

No lights
No machines, just hard physical labor
No phones
No devices making you a favor
A large solar flare, making this modern life impossible to bear
A revolution that would fail, we shouldn't have stepped on the monsters tail
Facing the primitive conditions

Dark seas
All we have is an empty shell
Dark skies
I hope the earth would threat us well
Oooohhhâ€¦ We are living in a black universe

Transportation, no water, no medical care, communication, a lifestyle that would be impossible to bear
A train not running on steam and coal, communication by an mobile telephone
A light that could be turned on and off, all the shit that makes life not so tough
Facing the primitive conditions

Dark seas
All we have is an empty shell
Dark skies
I hope the earth would threat us well
Oooohhhâ€¦ We are living in a black universe

Is it real.. Is it realâ€¦ Is it realâ€¦ Are we pushing it to the worse
Is it real.. Is it realâ€¦ Is it realâ€¦ We are living in a black universe

Dark seas
All we have is an empty shell
Dark skies
I hope the earth would threat us well
Oooohhhâ€¦ We are living in a black universe
