Hellrider

Judas Priest

Here they come
These Gods of steel
Megatron
Devouring what's concealed
Speed of death
Cross fired they stare
Final breath
From vaporizing glares
Raised to man oppressed
Sign of persecution
Hellrider
Roars on through the night
Hellrider
Raised for the fight
All incensed
To overthrow
Strong defense
With armaments they grow
By this quest
Their fate's renowned
Put to rest
Abominations grow
Time to ram it down
Judgment for the tyrant
Hellrider
Roars on through the night
Hellrider
Raised for the fight

Fight undying and eternal
Wheels bring death and pain infernal
Honor bound your strength repleted
To no end they're undefeated
Hellrider, hellrider
You fought their battle for them
Hellrider, hellrider
You brought them through their despair
Hellrider, hellrider
Your tempered steel relinquished

Hellrider, hellrider
You slaught them all extinguished
Wrath of doom
In killing fields
They consume
Their valiants never yield
Triumph to the Gods
Vanquished of enslavers
Hellrider
Breaking their will
Hellrider
In for the kill
Hellrider, hellrider
You fought their battle for them
Hellrider, hellrider
You brought them through it all
Hellrider
