

The Long Way Around

Jackson Browne

I don't know what to say about these days
I'm seeing people changing in the strangest ways
 Even in the richer neighborhoods
 People don't know when they got it good
They got the envy and they got it badWhen I was a kid everything I did was trying to be free
 running up and down tinsel town with the fire inside of me
 my planets all in retrograde the best of all my plans got made
 I made my breaks and some mistakes
Just not the ones people think I madeI'm a long way gone down this wild road I'm on
 It's gonna take me where I'm bound
It's a long way aroundIt's a little hard keeping track of what's gone wrong
 The covenant unravels and the news just rolls along
 I can feel my memory letting go some two or three disasters ago
 It's hard to say what did more ill,
Citizens United or the Gulf Oil SpillI'm a long way gone down this wild road I'm on
 It's gonna take me where I'm bound
 It's a long way aroundIt's never been that hard to buy a gun
 Now they'll sell a Glock 19 to just about anyone
The seeds of tragedy are there and what we feel we have the right to bear
 and watch our children come to harm
 There in the safety of our arms
 We all disagree about
The passions burn, heart goes outWe're a long way gone
 Down this wild road we're on
 It's going to take us where we're bound
 It's just the long way around
