

Little Death

+44

Please sleep, my darlin', sleep
Your cry for inspiration
Never reaches ears on distant starsAnd every night our lonely planet
Slides across the universe
And I won't pretend, I understandPlease sleep, my darlin', sleep
Your death by information
Won't disturb the peace on distant starsAnd even when you lock the doors
And slide behind the unlit shades
None of us saw strangers anymoreFall asleep with the windows open
Come to me with the worst you've said and done
You'll close your eyes and see me
A little death makes life more meaningful
I stand no chance at allPlease sleep, my darlin', sleep
Your car crash in slow motion
Won't upset the pace on distant starsAnd one by one the years of our lives
Stumble as the moments pass
So please hold on, please hold onSo fall asleep with the windows open
Come to me with the worst you've said and done
You'll close your eyes and see me
A little death makes life more meaningful
I stand no chance at allPlease sleep, my darlin', sleep
Please sleep, my darlin', sleepSo fall asleep with the windows open
Come to me with the worst you've said and done
You'll close your eyes and see me
A little death makes life more meaningful
I stand no chance at all
