Central Park

Lifehouse

This time away brings me even closer
So much to say, I've been thinking over
All the things you do to make me smile
I see your face around every corner
Each passing day is a little longer
Can't fall asleep, so I count the milesAs sure as the sun going down
I'll always be around
I'll always be aroundI'm afraid of living here without you
My years were made to wrap my life around you
When I'm away, our souls are tiedAs sure as the waves crash to the shore
I'll always be yours
I'll always be yours, ohI'm in the dark, and there's a light that's shining
In Central Park, where all the ghosts are hiding
This city spark starts to fadeAs sure as there are stars up above
You'll always be lovedAnd as sure as gravity pulling us down
I'll always be around
I'll always be around
