

# Still On Fire

## Aztec Camera

I'm in love with everything that breaks the grip of caution  
On our getting up and leaving for a bigger day, still some say  
That all you need is money to be free from what is poor  
Well that's the lie of looking up from somewhere down Because the sun will show to testify that all the  
Time between belongs to you and I, to be still on fire  
And when the strongest words have all been used  
And all the new ones sound confused, to be still on fire Somewhere in the middle we could see through all the  
people  
And be playing second fiddle and be feeling sore  
Shown the door to chase out all the child in you  
Is throwing out the baby for the chance to make it easy to be more And the sun will show to testify that all the  
Time between belongs to you and I, to be still on fire  
And when the strongest words have all been used  
And all the new ones sound confused, to be still on fire When the sun will show to testify that all the  
Time between belongs to you and I, to be still on fire  
And when the strongest words have all been used  
And all the new ones sound confused, to be still on fire And the sun will show to testify that all the  
Time between belongs to you and I, to be still on fire  
And when the strongest words have all been used  
And all the new ones sound confused, to be still on fire
