

I Give My Heart

John Berry

Before you even call my name
I will be there by your side
When your standing at the rivers edge
I will be the bridge you findIf you said, "Meet me now beyond the stars"
I'd pack my bags and go that far
With the strength that only love commands
I give my heartKeep it with you if you have to go
It will see you safely home
Wrap it 'round you like your favorite coat
When your called out in a stormIf you lose faith in who you are
I'd bring you back, I'd go that far
With the strength that only love commands
I give my heartWhen all that's left of me
All the words in this song
I know this love will carry onWith the strength that only love commands
I give my heart
