Everblue

Scudelia Electro

Love doesn't come alone, now does it?
Present perfect tense
So you made yourself a little world
Where even strangers make more sense
I play the pain upright straight ahead and with the beat
You can ease yourself into the light
Or keep that record on repeat
What if I loved you? What if I loved you?
What if I loved you everblue, everblue?
Following the sleepless hours
Unsubtle dreams will make you cave
You can paint them all your brilliant colors
Just don't fall off into the deep
Happiness is not a burden
Oh, how the pendulum will swing
I have felt the ground, I've seen the seeds
Out of which grew golden wings
What if I loved you? What if I loved you?
What if I loved you everblue, everblue?
High above the stars are dancing
To a song one bird is singing
And it's you, my everblue
What if I loved you? What if I loved you?
You know I love you, my everblue, everblue
everblue, everblue
