

# Child Star

## The Unicorns

Child star, child star  
You've reached the end of the road  
They only wanted you  
When you were good as gold Child star, child star  
You've had a pretty long run  
Go back to the real world  
While you're still young Did you think this love would last?  
Did you think this love was true?  
It came and went so fast  
They loved somebody but it wasn't you Child star, child star  
This is where we get off  
Stay on and ride awhile  
Till the road gets rough They loved somebody but it wasn't you Child star, child star  
Live and learn and move on  
Go back to the real world  
While you're still young
