

# Mask of Silence

## Cindergarden

Mask Of SilenceHold out my hand mixed blessings received

I must defend myself against the odds preconceived

Shadowy figures, what's their intent

Dirt on their hands, they're not innocentYou must hold this mask of silence

You can wait now in the violencePrecious by day victim by sight

Little time left to bring injustice to the light

I must allow myself some places to go

where they cannot find me

A side I'll never show
