

I Have Space

Mates of State

I'm spending over
Time without shoulders
Tired of arrivals
Thanks for the break I've lasted longer
Lengths all seem wider
After this I'm over
Spent on the breaks But any time is better than now
It's slipping away all the while
But any time is better than now
I have not any new complaints
But any time is better than now
Performing at length per advice
To encourage that the cycle is down
