Last Year

Lucie Silvas

Seasons change and there they go
It's not over, give me hope
It don't seem like it was before
It's time I told you that I need moreToday the wine is not sweet enough
And there's no flavor to your vintage loveYou don't give me the words I want to hear
If you want me to stay baby make it clear
You're not showing me love like you did last year
Like you did last yearChase the moon across my sky
Save the picture of you and I
Lovers race, was won too soon
Looks like you've given up and running out
And I won't wait for youThe stars ain't shining bright enough
And venus doesn't seem to favor usYou don't give me the words I want to hear
If you want me to stay baby make it clear
You're not showing me love like you did last year
Like you did last yearJust come here and we'll talk all about it
Well it's much too precious to lose so easily
Just go back to where we used to beGive me the words I want to hear
If you want me to stay baby make it clear
You're not showing me love like you did last year
Like you did last year
