Wish I could put my finger right on it (oh)
I cant' describe it but I know this feelings real

Tell me where to meet you (meet you)
Do anything to see you (see you)
Anytime night or day
I'll already know you when I see you (see you)
Kiss your hand and greet you (greet you)
So won't you be on your way
Chorus
It's like I already know you
Before I even meet you
What took you so long bae (what took you so long bae 2x)
It's like I already love you
Before I even meet you
What took you so long bae (what took you so long bae 2x)

These past days fly by
Waiting for you to come in and change my life

Cause I'll be gone till November

Seems like I waited all my life
For you to get here
Feels like everyday is Valentines

Your everything and so much more

Girl it's you I adore
And I hope and pray (hope and pray)
You stay with me (you stay with me)
Like love I've always known

Shh...
I should apologize
For assuming I already knew you
There was something so familier about you...
Touch, your kiss, and every stoke of your body
So my question is
What took you...so long
