Get Down

B4-4

I will be the one to love and comfort you
From now until the day I die
I will take you places that you only think
About when you're asleep at night
Let me take the time to understand
And I will set your spirit free
If you get down on me
I'll get down on you
I will do anything
That you want me to
It's a game of give and take
To make it through
So if you get down on me
I'll get down on you tonight
Nighttime turns to day again
And you are on my mind
Winter turns to spring and then
Life has passed you by
Right now we are so young and free
But we're runnin' out of time
So while we've got each other here
Let's treat our bodies right
I wanna know exactly what to do, so that
You'll never get me off of your mind
Communicate and I'll go under cover, gonna
Make you come tonight over to my house
If you get down on me
I'll get down on you
I will do anything
That you want me to
It's a game of give and take
To make it through
So if you get down on me
I'll get down on you tonight
I'm not the type to change your mind
If you wanna take it slow
No pressure to go all the way
There are often places we can go
Anytime is the right time to reveal it, when

Two people fall as deep as you and me
I wanna know every inch of your body so I
Can set you spirit free
If you get down on me
I'll get down on you
I will do anything
That you want me to
It's a game of give and take
To make it through
So if you get down on me
I'll get down on you tonight
I will be the one to love and comfort you
From now until the day I die
I will take you places that you only think
About when you're asleep at night
If you open up to me, I'll make you realize
The things that you could never see
Let me take the time to understand and I will
Set your spirit free
If you get down on me
I'll get down on you
I will do anything
That you want me to
It's a game of give and take
To make it through
So if you get down on me
I'll get down on you tonight
I'll get down on you
I will do anything
That you want me to
It's a game of give and take
To make it through
So if you get down on me
I'll get down on you tonight
