

Whatchu Need

Toni Braxton

Now what you need I got it
Hey, yo, Toni now what you need I got it
Dark child, now, what you need you got it
Yeah, Lets go Let me tell you how it goes when I handle mines
You know who, you with no one else can cross the line
Your let it be known, I'm your girl that's why
There's no need to roam, you can just call me any time What your looking for you can find in me
All I want to do is spend sometime with you
All your fantasies will be reality
I'll be all that you dream so come and be with me And you'll see that, what you need
I've been waiting for you
So decide if you really want it
What you need I've got more than enough Believe it I've got it, what you need
I'll be available to you 24/7
What you need, I got all of me
Everything that you need That you need
That you need
That you need
That you need
That you need
That you need
That you need Now that I've got your attention
Let me tell you how I feel
Ain't say this no more
Cause I'm laying it down for real Ain't no need to go and cheat
There's no need to lie
Don't go wasting my time
Cause if your mine your all mine What your looking for you can find in me
All I want to do is spend sometime with you
All your fantasies will be reality
I'll be all that you dream so come and be with me And you'll see that, what you need
I've been waiting for you
So decide if you really want it
What you need I've got more than enough Believe it I've got it, what you need
I'll be available to you 24/7
What you need, I got all of me
Everything that you need Can't you see I've got what you need
If tonight is for real I'll give something to you too
Do you realize fantasize, what you want to do

Look around can't you see, I've got what you need
What you need
I've been waiting for you
So decide if you really want it
What you need I've got more than enough
Believe it I've got it, what you need
I'll be available to you 24/7
What you need, I got all of me
Everything that you need
What you need
I've been waiting for you
So decide if you really want it
What you need I've got more than enough
Believe it I've got it, what you need
I'll be available to you 24/7
What you need, I got all of me
Everything that you need
That you need
That you need
That you need
