

# Here It Comes

**Martin Grech**

This is a call a call to all  
It goes out to those who've been there  
And I should know because I've been  
    Maybe once a week on Mondays  
    You should have seen what I've seen  
She doubles up and comes back Sundays  
    And she will come into your heart  
    It goes on and on and on  
        Here it comes  
        Here comes my days in the sun  
        Here it comes  
        Here comes my time in the sun  
        This is the day, this is the time  
        To stare at the skies in wonder  
        We live a lie, you'll never find  
        Never in a month of Sundays  
    You should have seen what I've seen  
He doubles up and comes back Mondays  
    And he will come into your heart  
    It goes on and on and on  
        Here it comes  
        Here comes my days in the sun  
        Here it comes  
        Here comes my time in the sun  
        And you don't know how it feels  
        Here it comes  
        Here comes my time in the sun  
        Here it comes  
        Here comes my days in the sun  
        Here it comes  
        Here comes my time in the sun  
        And you don't know how it feels  
        Here it comes  
        Here comes my time in the sun
