

# Little Song

## The Secret Handshake

I've been tryin to write a song about you  
I've been trying here but no such luck  
And I've been tryin to write that describes just how much

I need you tonight  
And I've been working at this song for ages  
I wanted to make sure it came out right  
I hope that it's just how things really are here  
And, how i am, feeling for you

I wanna write  
The soundtrack to your life  
And live it with you (with you)  
[x2]So first I started with this simple beat and  
I even added a piano tune  
But then I had to think of words that describe  
The things I really wanna sing to you (oh)  
So now i'm working on this melody and  
I think that I could add a harmony  
I just want for this song to come together

Then maybe you'd see what you mean to me  
I wanna write  
The soundtrack to your life  
And live it with you (with you)  
[x4]So baby just remember  
As this song hits your ears  
I'm tryin to turn the way I feel for you  
Into something that you can hear  
But how can words of music  
Explain what love is  
Nothing I could ever sing would do it justice  
And I don't know where to start  
I just want you to hear the song in my heart (oh)  
I wanna write  
The soundtrack to you life  
And live it with you (with you)  
[x4]
