

# Us Against the World

Christina Milian

If the sun shuts down and decided not to shine no more  
I would still have you, baby  
If we see the last day and they say we gotta go to war  
I'll be fighting with you, babyCuz I know if I'm falling, you won't let me hit the ground  
If the boat is sinking, I know you won't let me drownNo matter what anyone could say  
This is the only place for me  
And no one could ever take that away  
Nothing could come between usIf the sun shuts down and decided not to shine no more, no more  
I would still have you, you, you, you, you, you, you  
If we see the last day and they say we gotta go to war, to war  
I'll be fighting with you, you, you, you, youBecause it's us against the world  
The world, the world  
You know it's us against the world  
The world, the world, ohhNow if I'm lost at sea 7 days, I'm not alone  
If I'm holding you, you, you, you, you  
And if it all end's; everybody in the world is gone  
I'll be standing with you, babyAnd if it's the last breath I take  
I'll leave my kiss my with you  
If there's a wall between us, baby  
I know I'll break throughNo matter what anyone could say  
This is the only place for me  
And no one could ever take that away  
Nothing could come between usIf the sun shuts down and decided not to shine no more, no more  
I would still have you, you, you, you, you, you, you  
If we see the last day and they say we gotta go to war, to war  
I'll be fighting with you, you, you, you, you  
Because it's us against the worldNothing's stronger now than you and I  
Cause your love is all I got  
And this ain't never gon' stop, no, whoaThere's no distance here when we're apart  
Come on in from the cold, lay your head on my shoulder  
Ride like a soldier, I'ma stay right hereIf the sun shuts down and decided not to shine no more, no more  
I would still have you, you, you, you, youBecause it's us against the world  
The world, the world  
You know it's us against the world  
The world, the worldBecause it's us against the world  
The world, the world  
You know it's us against the world  
The world, the world  
Because it's us against the world
