

How the Day Sounds

[Greg Laswell](#)

Oh who would have ever known this?
Could be this easy
I was a long, long way off
Then just like that it was over
Everything I knew of love

I was a long, long way off And I think I like how the day sounds
Like how the day sounds through this new song Thank you for opening the window

The sky is clear as my mind is now
I was a long, long way off
Join me in welcoming the sun in
It's much brighter than the night I hid in

I was a long, long way off And I think I like how the day sounds
Like how the day sounds through this new song
And I think I like how the day sounds

Like how the day sounds through this new song From a long way down. Yeah, it's well worth the time that its
taken to get here now

Yeah, it's well worth the time that its taken to get here now Ba da dum... So go ahead and bang a gong
Nothing can drown out the sound and the whisper of my love And I think I like how the day sounds
Like how the day sounds through this new song
And I think I like how the day sounds
Like how the day sounds through this new song
Through this new song

Through this new song And the lines have all been drawn
I know where I belong, where I belong,
Where I belong
And the lines have all been drawn
I know where I belong

Where I belong And I think I like how the day sounds
Like how the day sounds through this new song
And I think I like how the day sounds

Like how the day sounds through this new song Oh, won't you sing along
Oh, my love won't you sing along
Oh, won't you sing along
Oh, my love won't you sing along
Oh, won't you sing along
Oh, my love won't you sing along
Oh, won't you sing along
Oh, my love won't you sing along
