Vagabonds

Satellite Stories

We live without design
Body stand under the lights of small corner stores
I know we all follow
First, you forget the things you need
And it goes, and it goes, and it goes away now
This time I stay, this time I stay
The next, you forget yourself and see
And I try, and I try, and I try to stand now
Each time I stayYou think you've heard it all before the show
But you never really seen or settle
Once you've heard it all upfront you know
That you never really knew or settle
You think you've heard it all before
Vagabonds, we're Vagabonds
Vagabonds, we're VagabondsWe live without the highs, the lows
And truth was the only thing
That you wore
Where have you gone
First, you forget the things you need
And it goes, and it goes, and it goes away now
This time I stay, this time I stay
The next, you forget yourself and see
And I try, and I try, and I try to stand now
Each time I stayYou think you've heard it all before the show
But you never really seen or settle
Once you've heard it all upfront you know
That you never really knew or settle
You think you've heard it all before
Vagabonds, we're Vagabonds
Vagabonds, we're VagabondsIf I could change
If I could change this fear I...
If I could change
If I could change this fear I wouldIf I could changeYou think you've heard it all before the show
But you never really seen or settle
Once you've heard it all upfront you know
That you never really knew or settle
You think you've heard it all before
Vagabonds, we're Vagabonds
Vagabonds, we're Vagabonds
