

# We Need Love

## Ras Indio

In Birmingham, in London, what we need now is love  
Not hate and fear, blood and tears, what we need now is love Walking down my street tonight, West London  
style  
There's something in the air tonight, I haven't felt for a while  
I see the fear, I see the fear in your eyes  
When they keep you afraid you believe all their lies In the county towns, in football grounds, what we need now  
is love  
Not suspicion, division, what we need now is love  
In Washington, New York City, what we need now is love  
Not hate and fear, blood and tears, what we need now is love Walking down my street today, West London style  
There's something going on today, everyone's acting wild  
I see the fear, I see the fear in your eyes  
When they keep you afraid you believe all their lies In Liverpool, in Glasgow, what we need now is love  
Not suspicion, division, what we need now is love  
In Washington, New York City, what we need now is love  
Not hate and fear, blood and tears, what we need now is love What we need now is love  
What we need now is love When the sun goes down, on the mill towns, what we need now is love  
Not suspicion, division, what we need now is love  
In Washington, New York City, what we need now is love  
San Salvador, me amor, what we need now is love What we need now is love  
What we need now is love  
What we need now is love  
What we need now is love
