

All for You

In This Moment

The seasons come and go
Another night another show!
I step into the light
Knowing we will be alright!
Even when I'm far
You know I'm always there with you
And through this all
You know that your the reason in everything i do
Its all for you!
You know that your my reason in life
Its all for you
Its all for you
These faces come and go
And all i do is think of you
I'm on the long road home
The road that leads me straight to you
I know it's hard
I promise you we'll be alright
and through this all
You know that your the reason in everything i do
It's all for you
You know that your my reason in life!
It's all for you
It's all for you
Even when I'm far
You know I'm always there with you
And through this all
You know that your the reason in everything i do
Its all for you
You know that your my reason in life!
Its all for you
You know that your the reason in everything i do
Its all for you
You know that your my reason in life!
Its all for you
Its all for you
