Ice Machine in the Desert

Brave Combo

Some people in africa have never seen ice
How could they?
How could they?
Cause it's hot there, most of the time, and when it's not
It's warm
The sahara desert is very big
Yet in that void I see
An ice machine on nothing
There's no electricity
An ice machine over-flowing with cubes
A frozen oasis of steel
Hummin' and providin' relief -
For the way people feel(chorus:)
Don't forget your bucket, don't forget your bucket
Don't forget your bucket, bucket. don't forget your bucketYou know, gila monsters cross the road from here to el paso
Every poisonous snake in the land can be found here too, ya know
And scorpions aren't afraid -- they give you very little space
They make you line up in single file so try not to lose your placeRepeat chorus(spoken: c'mon jeffrey!)How can I make you see, the things you can't believe?
Your fear is illogical you seem very wise but that doesn't matter to me
For I was back in the sandbox playin' with toys when I spilled my coke
And like a fur-covered spoon it made me think, isn't life a funny joke
It's like an ice machine over-flowing with cubes
A frozen oasis of steel
Hummin' and providin' relief -
For the way people feelRepeat chorusDon't forget your bucket, bucket
Don't forget you bucket
Don't forget you bucket, bucket, bucket
Don't forget your bucket, bucket, bucket
Don't forget your bucket, hey!
Don't forget your bucket
